

BAB V

KESIMPULAN DAN SARAN

A. Kesimpulan

Berdasarkan hasil penelitian dan pembahasan pada bab IV, maka peneliti dapat menarik kesimpulan bahwa secara simultan kualitas pelayanan *barista* berpengaruh terhadap kepuaan konsumen di *space coffee & roastery* yang bedasarkan pada tabel 4.13 dengan nilai konstanta 1,084 yang berarti Ha1 diterima, sedangkan variabel keandalan (*Reliability*) berdasarkan tabel 4.13 kolom beta (B) mempuanyai pengaruh secara dominan dengan angka 0,714 maka Ha2 diterima.

Berikut Rincian dari uji F, Uji T, serta uji determinasi R^2 , dibawah ini :

1. Uji Anova atau uji F

Berdasarkan tabel 4.14 didapatkan nilai f hitung sebesar 46,788 dengan probabilitas 0,00 .karena probabilitas $< 0,05$ maka variable kualitas pelayanan yang di wakili jika bukti langsung (*Tangible*) (X1) , keandalan (*Reliability*) (X2), daya tanggap (*responsiveness*) (X3), jaminan (*assurance*) (X4), kepedulian (*emphaty*) (X5) secara simultan berpengaruh terhadap kepuasan konsumen di *space coffee & roastery* maka dari itu Ha1 diterima.

2. Uji parsial/uji T

Dari uji parsial / uji T ditabel 4.15 diperoleh bahwa tidak secara keseluruhan T hitung lebih besar daripada T tabel. Maka dapat disimpulkan, bahwa variabel kualitas pelayanan bukti langsung

(*Tangible*) (X1) , keandalan (*Reliability*) (X2), daya tanggap (*responsiveness*) (X3), jaminan (*assurance*) (X4), kepedulian (*emphaty*) (X5), tidak semua variable berpengaruh secara parsial atau individual terhadap kepuasan konsumen di *space coffee & roastery*. Berdasarkan hasil perbandingan koefisien regresi linear berganda, nilai t hitung terbesar diperoleh oleh variabel X2 yaitu variable keandalan (*realibility*) dengan nilai t hitung sebesar 4.295,dengan hasil analisis menunjukkan nilai t hitung $4.295 > 1.985$ sehingga menunjukan bahwa **Ha2** dapat dinyatakan diterima.

3. Uji Determinasi R²

Berdasarkan tabel 4.16 menunjukkan besarnya nilai adjusted R² yang diperoleh sebesar 0,713 atau 71,3% .Adapun nilai pada Adjusted R Square menunjukan bahwa variabel independen daya tanggap (*tangible*), keandalan (*realibility*), daya tanggap (*responsiveness*), jaminan (*assurance*), kepedulian (*emphaty*) *buy* dapat menjelaskan atau berkontribusi sebanyak 71,3% terhadap kepuasan konsumen. Sisanya, sebesar 28,7% dipengaruhi oleh variabel diluar penelitian ini.

B. Saran

Berdasarkan hasil yang sudah didapatkan oleh peneliti, dengan segala prosesnya baik itu penelitian, pembahasan dan kesimpulan, peneliti menyarankan kepada pihak *space coffee & roastery* agar memperbaiki lagi dalam hal :

1. Diharapkan semua pihak lebih memperhatikan *service* kepada konsumen dengan mengutamakan kesigapan, keramahtamahan, dan menangani keluhan konsumen dengan baik lagi
2. Lebih memperhatikan kebersihan toilet, serta bisa diberi penunjuk jalan ke toilet karena beberapa konsumen yang diwawancara, mengeluhkan kurangnya informasi toilet.
3. Lebih *responsive* jika ada table yang kotor dengan cara clear up table jika sudah tidak ada konsumen duduk atau posisi gelas sudah kosong. Peneliti pada saat pengambilan sample, mendengar keluhan jika meja kotor dalam waktu agak lama, dan tidak segera di bersihkan. Saran peneliti agar lebih sering dalam check area agar lebih terjaga kebersihannya sehingga menimbulkan kenyamanan kepada konsumen.
4. Meja *tester* alangkah baiknya diberi tulisan *coffee tester*, untuk memudahkan konsumen dalam mengetahui area *space coffee & roastery*, terutama *tester* area, serta untuk memudahkan barista dalam penyampaian informasi, karena area tersebut merupakan salah satu daya tarik konsumen.
5. Dikarenakan variable *Emphaty* merupakan variable yang paling sedikit taraf signifikansinya bahkan mencapai titik negative, maka saya menyarankan agar pihak coffeeshop melakukan pendampingan dalam pengembangan inisiatif dan kepedulian terhadap konsumen, bisa melalui pelatihan ataupun pengawasan serta evaluasi rutin dari pihak *head bar/spv*.
