

BAB V

PENUTUP

A. Kesimpulan

Nilai R *Square* sebesar 0,321 atau 32,1% yang berarti bahwa variabel bebas *digital marketing* (X) berpengaruh sebesar 32% terhadap variabel terkait minat kunjung wisatawan (Y). Sehingga sisanya sebanyak 68% minat kunjung wisatawan dipengaruhi oleh faktor lain diluar variabel yang diteliti. Dari dugaan yang telah dibuat (H_0) tidak adanya pengaruh *digital marketing* terhadap minat kunjung wisatawan di Taman Tebing Breksi, namun faktanya dapat dilihat dari hasil uji hipotesis yang mengatakan bahwa nilai $t_{hitung} > t_{tabel}$ ($6,806 > 1,987$) maka hipotesis (H_0) ditolak yang artinya ada pengaruh antara variabel *digital marketing* (X) terhadap variabel minat kunjung wisatawan di Taman Tebing Breksi (Y).

Koefisien regresi nilai (b) sebesar 0,569 (positif) yaitu menunjukan pengaruh yang searah yang artinya setiap penambahan kualitas *digital marketing*, maka akan meningkatkan minat kunjung wisatawan sebesar 0,569. Koefisien regresi tersebut bernilai positif. Maka pengambilan keputusan regresi linier sederhana berdasarkan nilai signifikansi dari tabel *coefficients* diperoleh nilai signifikansi sebesar $0,000 < 0,05$, sehingga dapat disimpulkan bahwa variabel *digital marketing* (X) berpengaruh terhadap variabel minat kunjung wisatawan (Y).
